Bangor, December, 1857.

IMPORTANT, DISCOVERY!

CONSUMPTION CURABLE

BY THE USE OF

Fousel's Fabulum Vitæ.

This VEGETABLE PRODUCTION has proved itself to be the most remarkable medicinal preparation ever discovered, for the effectual cure of

Pulmonary Consumption,

and also of COUGHS, COLDS, SORENESS ON THE CHEST, BRONCHIAL IRRITATION, and all other affections of the air passages, which have a tendency to produce that FEARFUL MALADY in those predisposed.

This wonderful discovery, from its volatile nature, gives vapors freely, and consequently acts DIRECTLY upon the Lungs and Air Passages, arrests the development of tubercles in the lungs, and in their softening process causes the matter to be expectorated without difficulty, and effectually heals the ulcerated cavity; it quiets the cough, subdues the night sweats, the hectic fever and the chills, and restores the healthy functions to all the organs of the body. A trial of one bottle will speedily convince the most skeptical of its astonishing efficacy, and its superiority to all other specifics.

CERTIFICATE OF DR. A. A. HAYES in reference to the *medicinal* virtues of this great discovery:

"This preparation by chemical analysis, was proved to be free from Opium or any of its compounds: nor were any of the Alkaloids present. It does not contain any mercurial or mineral substance, but consists wholly of volatile, diffusible agents, which afford vapors freely at a moderate temperature. Most of the substances present are officinally used in alleviating pulmonary diseases, but the device by which they are combined is new and original, and adapts the compound to inhalation, or other modes of administration."

Respectfully, (Signed) "A. A. HAYES,
State Assayer."

No. 15 Boylston street, Boston, Dec. 19, 1857.

Directions in English, French and German, accompany each package. Price $3 per bottle.

THE CRYSTAL OIL LAMP,

For Burning the Crystal Oil,

Combining Economy and Safety!

PATENT RIGHTS

FOR STATES & COUNTIES FOR SALE!

This important invention for producing the *cheapest* light in the world, is now perfected and offered to the public. Numberless other attempts have been made to produce a cheap light, but were attended with such inherent objections as to destroy their utility and adoption. But the Crystal Oil Lamp, while it is the *cheapest*, is both safe and agreeable in every position, making a *clear, white and brilliant flame*, entirely free from *smoke or odor*. There is no danger from explosion, that is *perfectly safe* under all circumstances. The oil can be used in any place without fear of soiling the nicest garments. The lamps are *simply* arranged and perfectly controllable by the children and domestics, and so constructed that the light can be varied in a moment from that of one to eighteen or twenty ordinary lamps. While it is free from the disagreeable smell arising from the Kerosene, and the danger attending the use of burning fluid, it is found upon scientific computation to produce

As much LIGHT for ONE CENT as Kerosene will for Three Cents, or Burning Fluid will for Six Cents.

Thus saving five-sixths of the entire amount now expended, or the price of the lamp, in about a month. They are adapted to all situations, making the cheapest and most desirable light for every place—the largest halls or churches as well as private dwellings. The patent on this lamp for the different States and Counties throughout the Union, with the exclusive sale of the Crystal Oil is now offered to the public, presenting a rare opportunity for merchants to secure for themselves the monopoly of a trade entirely free from opposition. Patentees are completed for the manufacture of the lamps in such quantities that they will be furnished to the purchasers of rights in any style, at such a cost as will yield an almost incredulous profit. These rights will be closed off immediately, and the lamps and oil delivered as soon as desired. As no lamps or oil will be sold to any but purchasers of rights, all letters making the request will not be noticed. Communications addressed to the "Crystal Oil Lamp Co.," No. 5, Merchants Row, will be promptly attended to.

The following remedies are offered to the public as the best, most perfect, which medical science can afford. AYER'S CATHARTIC PILLS have been prepared with the utmost skill which the medical profession of this age possesses, and their effects show they have virtues which surpass any combination of medicines hitherto known. Other preparations do more or less good; but this cures such dangerous complaints, so quick and so surely, as to prove an efficacy and a power to uproot disease beyond any thing which men have known before. By removing the obstructions of the internal organs and stimulating them into healthy action, they renovate the fountains of life and vigor, health courses anew through the body, and the sick man is well again. They are adapted to disease, and disease only, for when taken by one in health they produce but little effect. This is the perfection of medicine. It is antagonistic to disease, and no more. Yet children may take them with impunity. If they are sick they will cure them, if they are well they will do them no harm.

Give them to some patient, who has been prostrated with bilious complaint; see his bent up, long-lost appetite return; see his sallow skin blossom into health. Give them to some sufferer whose foul blood has burst out in scrofula till his skin is covered with sores; who stands, or sits, or lies in anguish. He has been drenched inside and out with every potion which ingenuity could suggest; see the scabs fall from his body; see the new, fair skin that has grown under them; see the late leper that is clean. Give them to him whose angry humors have planted rheumatism in his joints and bones; move him, and he screeches with pain; he has been soaked through every muscle of his body with liniments and salves; give him these, for, alas! there are cases which no mortal power can reach; but mark, he walks with crutches now, and now he walks alone; they have cured him. Give them to the lean, sour, haggard dyspeptic, whose gnawing stomach has long ago eaten every smile from his face and every muscle from his body. See his appetite return, and with it his health; see the new man. See not that was radiant with health and loveliness blasted and too early withering away; want of exercise or mental anguish, or some lurking disease, has deranged the internal organs of digestion, assimilation or secretion, till they do their office ill. Her blood is vitiated, her health is gone. Give her these PILLS to stimulate the vital principle into renewed vigor, to cast out the obstructions, and infuse a new vitality into the blood. Now look again—the roses blossom on her cheek, and where lately sorrow sat joy bursts from every feature. See the sweet infant wasted with worms. Its wan, sickly features tell you without disguise, and painfully distinct, that they are eating the life away. Its pinched-up nose and ears, and restless sleepings, tell the dreadful truth in language which every mother knows. Give it the PILLS in large doses to sweep those vile parasites from the body. Now turn again and see the ruddy bloom of childhood. Is it nothing to do these things? Nay, are they not the marvel of this age? And yet they are done around you every day.

Have you the less serious symptoms of these disorders, they are the easier cured. Jaundice, Costiveness, Headache, Sickness, Heartburn, Foul Stomach, Nausea, Pain in the Bowels, Flatulency, Loss of Appetite, King's Evil, Neuralgia, Gout, and kindred complaints arise from the derangements which these PILLS rapidly cure. Take them perseveringly, and under the counsel of a good Physician if you can; if not, take them judiciously by such advice as we give you, and the distressing, dangerous diseases they cure, which afflict so many millions in the human race, are cast out like the devils of old—they must burrow in the brutes and in the sea. Price 25 cents per box—5 boxes for $1.

Through a trial of many years and through every nation of civilized men, AYER'S CHERRY PECTORAL has been found to afford more relief and to cure more cases of pulmonary disease than any other remedy known to mankind. Cases of apparently settled consumption have been cured by it, and thousands of sufferers who were deemed beyond the reach of human aid have been restored to their friends and usefulness, to sound health and the enjoyments of life, by this all-powerful antidote to diseases of the lungs and throat. Here a cold had settled on the lungs. The day, hacking cough, the glassy eye, and the pale, thin features of him who was lately lusty and strong, whisper to all but him consumption. He tries every thing; but the disease is gnawing at his vitals, and shows its final symptoms more and more over all his frame.

The Richmond South speaking of the English Swindle truly says

"If the Conference Bill pass, Kansas may come into the Union as a Slave State OR SHE CANNOT COME IN AT ALL That is the issue.

That was undoubtedly intended to be the real issue,—so palpably so, that it will defeat itself The People of Kansas will never consent to come into the Union as a slave State and the People of the North will not to it that they are not long kept out of the Union for desiring to come in as a Free State There will be a Free State House of Representatives in session in eight months, and if there is also named by the South as persisted in, three or four years will be time enough for the people of Kansas to form a State Constitution and apply for admission. And if the injustice begun and to be persisted in shall have the effect to bring back the General Government to the position it occupied when Freedom was a recognized and preferred principle the People of Kansas may congratulate themselves that their loss has resulted in so great a gain to Humanity and Justice —*Albany Journal*

A SURGICAL OPERATION FOR THE INDIANA RIVER ROADS The following facts in a recent land case are from a condensed statement which we find in the Portland Advertiser

The recent refusal of the U S House of Representatives to investigate the charge of corrupt conspiracy against certain officers has not sufficed to suppress the facts of the case From these it appears that six thousand acres of land had been entered on the books of the Land Office in Dubuque Iowa in the name of Jesse D Bright, bogus Senator from Indiana As all such entries were thus prevented from entering or occupying any part of this six thousand acres of good land, that has been thus partitioned off to a speculator The whole principle of the granting of pre-emption rights to actual settlers was thus trampled under foot by our slaveocratic democracy It is now said Bright has for partners in this speculation, English and Foley, two Democratic members from Indiana The Washington Star admits that these warrants were sent out from Washington by the Commissioners of the Land Office As soon as these warrants reached Dubuque with the designated land, these lands were taken out of the market, and though the act of entry might not have been perfected for six months, no actual settler could enter an acre of that tract, thus giving three Democratic members of Congress a privilege not granted to common citizens Does any one believe that if their votes had not been necessary for the Lecompton swindle they could have done privately and at a distance, what others are required to do publicly and on the spot

The Turkish Rear Admiral Mehemet Pasha and suite arrived at Boston on Tuesday, and were to remain about four days. The Admiral put up at the Revere, and was Honored as much as time would permit. We learn with amusement, from the reporter of the Boston Journal, that he dressed in plain black and that without the assistance or knowledge of any committee of reception, he engaged and took possession of a suite of rooms Just think of it Engaged rooms without the assistance of any committee—Wendell Phillips He visited the Portsmouth Navy Yard on Wednesday and was pleased

THE RESPONSE OF THE FREE OF KANSAS TO THE ENGLISH SWINDLE—If any feared that the English Bribe would debauch the Free State men of Kansas they need fear no longer They spurn the Bribe They treat it as an insult and, by their tone and bearing demonstrate to the Administration that while votes enough were purchased to pass the swindle through Congress there is not gold enough in the Treasury to secure its ratification by the People of Kansas their patriotic determination furnishes new proof of their heroic devotion to Freedom.—*Albany Journal*

Col John C Fremont, with his family, arrived in San Francisco on the 12th of April He was proceeding to the mining region, and intended to remain several months in California

COL FORNEY READ OUT OF THE DEMOCRATIC PARTY The Washington Star, the President's lesser hand organ, pays its respects to Col Forney as follows

"The truth is Mr John W. Forney, with less excuse for his treasonable perversion than any other deserter from the Democracy ever had finds that his only remaining hope in politics is to strengthen the hands of the Republican party, and notwithstanding his record for a term of Buchanan declined to make him a member of his Cabinet, he is bold and reckless enough to play out the game of his Republican party backers to the bitter end

In a week after the great Pennsylvania State election Mr Forney will be thoroughly and avowedly identified with the Republicans as David Wilmot is at this moment."

NO. IV

HON WILLIAM ABBOT was the son of a worthy farmer of Wilton, in the State of New Hampshire, and a graduate of Harvard University, in the class of A D 1797 At this latter period, Hon William Gordon of Amherst, N H, was pre-eminently distinguished as an advocate and counsellor in the Bar of that State Mr Abbot sought admission, as a student in the law office of this gentleman, and was cheerfully received to partake of its benefits The same diligent attention to study pursued at college by Mr Abbot, was well maintained by him through his professional pupilage. Highly honorable achievements were made by him in the intricacies of legal lore, whereby his future usefulness and personal respectability were much promoted

After completing a full course of study, he was admitted to honorable membership at the Bar, and in A. D 1801 opened his office at Castine, (Me which was the shire town of the then extensive county of Hancock, and the commercial emporium of Penobscot bay and river His entire devotion to all the proprieties of life, as well as his constant attendance at his place of business, did not pass unobserved by the merchants and other energetic men among whom he had come to live All of his surroundings indicated that he was worthy of the confidence of a virtuous people His subsequent life supplied complete confirmation of the correctness of its foreshadowings Most of the important mercantile questions as well as disputes concerning the rights of parties claiming adverse interests to more local property, were submitted to his counsels on and advice The result was generally satisfactory to all parties, and conclusive—Thus, much litigation, great expenses and, what is more valuable, fervous heart burnings and neighborhood bickerings were avoided, while peace prosperity and kind heartedness were promoted. Happiness thus conferred upon others, was reflected back upon its author and was manifested by constant marks of respect and affection shown him by his townsmen and neighbors They often elected him both to municipal offices and to the office of Representative in the State Legislature

Mr Abbot was not an eloquent man, but was a sound lawyer, and was commonly employed as counsel in such cases as were litigated by any of his neighbors, and enjoyed a respectable amount of foreign business He was through many years Register of Probate of Wills &c, for the County of Hancock

Several towns and villages situated on the shores of Penobscot bay and river, that were more favorably situated than Castine for agricultural productions lumber trade, and many commercial operations, sprang up, very nearly at the time when Mr Abbot commenced his professional life In consequence of this movement, a large portion of the domestic trade that theretofore had been conducted at Castine was by transferred to those towns in which new and varied enterprises were entered upon, with a prudent and reasonable expectation of success and where population was rapidly increasing Under these circumstances, the prospect of additions to his professional labors, reputation and emoluments was diminishing instead of increasing Therefore Mr A deemed it expedient to exchange his residence at the declining town of Castine for one at the rapidly increasing town of Bangor He accordingly removed to the latter place in the year 1809, where he soon established for him self the substantial and dignified reputation that he had previously earned and worthily worn in the county of his former labors

Being an earnest and able friend of science, especially of youthful education, he was placed at the head of the Superintending School Committee of Bangor, from year to year, through numerous elections Under his fostering care a system and grade of schools, teachers and textseful structures which, it is believed, has no superior in the State, was developed and completed

A beautiful plat containing about three acres was purchased by the city, stocked with hand some shade trees, and ornamented with pleasant gravel walks Then by vote of the City Council it received the honored and well merited appellation of "Abbot Square" The PLAT is set apart and used for the exclusive purpose of schools, with suitable play grounds for the children

Confidence and respect for this estimable man was further manifested by his being elected to the office of Mayor of the city in the year eighteen hundred and forty eight Again in the succeeding year he was elected, with great unanimity, to the same office But he soon finished the work that his Heavenly Father had assigned to be performed by him on earth In August of the year he died and was deeply mourned for

JACOB MCGAW, Esq, descended from Scotch Irish parents of estimable character and much personal worth He was born at Merrimack, N H, in A D 1778 graduated at Dartmouth College in A D 1797, and soon afterwards became a student at law in the office of Hon Thomas W Thomson, Esq, at Franklin, (then Salisbury) N H

Having completed the usual term of study preparatory to admission as an attorney in the law courts of the New England States, and received testimonials of qualifications, was duly admitted, in A D 1801, to practice law in the courts of New Hampshire and Massachusetts. Early in that year he opened an office in the picturesque village of Fryeburg (Me,) that borders on the line of New Hampshire

This location enabled him to perform professional duties at the regular terms of all courts in one county at least, in each State

After devoting between four and five years to professional labors at this place with some success,—he concluded that a location affording facilities for mercantile as well as agricultural operations, would open a prospect for more varied pecuniary and call for greater mental efforts than the place of his residence then did, and probably provide a more ample pecuniary supply.

[illegible]

that might reasonably be entertained of its meeting his desires, Mr McGaw determined to make it his permanent home Pursuing this resolution, he removed to that place late in the autumn of A D 1805 Soon afterwards he married, and became one of its citizens Having had some experience at the bar, he soon engaged in the activities of his profession at his new home During the period of one full third part of a century from this time, he participated in the business and labors of the office, and in conflicts at the bar, quite as largely as his anticipations could reasonably foreshadow

Now, at this period, being admonished that the quiet of domestic retirement is more compatible with the condition of accumulated years, than listening to the angry tales of some clients, and the alleged grievances of others could be—he transferred all his interest in unfinished business on hand, to a gentleman who had been his junior partner through several preceding years, and sought in the bosom of his beloved family that peaceful enjoyment which seems appropriate to the down hill of life The cheerfulness that characterized his early manhood still continues, though suitably modified to meet the proprieties of his fourscore years

The Utah War is ended We believe there is no longer room to doubt the fact that Gov Cummings peacefully entered Salt Lake City on the 1st ult, and that a considerable portion of the Mormons had already left or were leaving, for some point in the South West We may fairly presume that Brigham Young and his chief counsellors were in the advance of this movement, and that neither marshal nor troops will be able to arrest them We shall be disappointed if the Mormons do not make their way out of the territories of the Union, and found a new "Zion," either in Sonora, Lower California or in some of the isles of the Pacific If such be their purpose, we trust they will be allowed to consummate it without further molestation on the part of our Government.—*Tribune*

The Washington correspondent of the Commercial Advertiser says

Some doubt is expressed by Senators whether Congress can adjourn on the 7th of June If they do, they may be recalled at least in the course of the summer, if not immediately Notice has been given in the House of a joint resolution to rescind the order for terminating the session on the 7th of June Legislative measures of importance are accumulating in both Houses

THE MORMONS —*St Louis, May 18* Mr Gorman, who left Camp Scott April 12 reports that Col Kane had been to Camp Scott, and had frequently passed from the camp to a place of conference with the leading Mormons outside In pursuance of negotiations then entered into Gov Cummings left the camp, April 6 for Salt Lake City, and was one on the 9th when about two days travel from the city He was accompanied by Col Kane, and escorted by Messrs Porter Rockwell, Egan and other Mormons It was anticipated he would reach the city on the 11th Handsome apartments had been provided for his reception

Well informed gentlemen, direct from Salt Lake say the general feeling in that city was in favor of peace, only a portion of the leaders advocating resistance

HEAVY ROBBERY—The Chicago Journal says a young man just arrived from the East, was robbed on Friday last of $960 He got on a spree and visited several places of fame and other dens in the city, in company with some hack drivers and sculpers On recovering from his spree, he found himself in a strange place and his pile gone "A fool and his money are soon parted

SUDDEN DEATH ON BOARD A STEAMBOAT — Mr Henry Kemp, of St John, N B, who was quite sick with consumption, took passage on board of the steamer Admiral, from St John yesterday morning, for Boston whither he was going for medical aid, was found dead in his berth on the arrival of the boat at her wharf in this city —*State of Maine*

"OLD HUNDRED" —You may fill your churches with choirs, with Sabbath prima donnas, whose daring notes emulate the steeple and cost almost as much, but give me the spirit-stirring tones of the Lutheran hymn, sung by young and old together Martyrs have hallowed it, it has gone up from the dying beds of the saints The old churches where generation after generation has worshipped, and where many scores of the dear dead have been carried, and laid before the altar where they gave themselves to God, seem to breathe of Old Hundred from vestibule to tower top—the very air is haunted with its spirit

I think, for a moment, of the assembled company who have, at different times and in different places, joined in the familiar tune! Throng upon throng—the stern, the timid the gentle the brave, the beautiful, rapt—their faces all beaming with the inspiration of the heavenly sounds!

"Old Hundred" king of the sacred band of ancient airs Never shall our ears grow weary of hearing, or our tongues of singing thee! And when we get to Heaven, who knows but what the first triumphal strain that we omes as may be

"Be thou, O God, exalted high."

A "SUBMISSIVE AND PATIENT WOMAN" —Mr Peabody one day came in from a walk His wife said to him, "I have been thinking of our situation, and have determined to be submissive and patient" "Ah said he, "that is a good resolution, let us see what we have got to submit to I will make a list of our trials. First we have a home—we will submit to that Second, we have the comforts of life—we will submit to that. Thirdly, we have each other Fourthly, we have a multitude of friends—Fifthly, we have God to take care of us—"Ah, said she "pray stop—I will say no more about submission.

Mrs Bennett, wife of the editor of the New York Herald, has a friend, Mr Pleurot, whom the President has nominated for consul at Bordeaux, France, but the Senate is in no hurry to confirm him, democratic members objecting Perhaps they think Bennett will desert when he gets his pay

A canary bird which recently died in Brooklyn, New York, was twenty six years old—"Dick," for that was his name had been blind for a year, was bald headed, and his feathers were bleached almost white It was time for him to go

RELIGION —Religion is like the firmament, the more it is examined, the greater number of stars will be discovered; like the sea the more it is observed, the more it appears to be immense, like fine gold—the more it is tried in the furnace, the greater will be its lustre.

LOCAL AND MAINE NEWS

The East Maine Conference of the M. E. Church.

Wednesday Evening

Anniversary of the Tract Society. Rev. T Hill offered prayer, Col Griffin presided, and Rev John Allen made the first speech—it was characteristically interesting and amusing—Rev S F DeHass, of New York, made a speech of great interest and power His eloquent utterances in favor of the Tract cause could not fail to advance its interests A very good anniversary was closed with a collection for the Tract Society

Thursday Morning, 8 o clock.

The Scriptures were read, and the Conference joined in singing the 666th hymn—

"Jesus, the Life, the Truth, the Way,
In Whom I now believe

Rev Sullivan Bragg of Frankfort, addressed the throne of grace Quite a number besides the members of the Conference were present. The business proceeded rapidly and harmoniously Took up the questions—Who remain on trial, and who are the deacons?

Rev Mr Thayer, delegate from the General Conference of Congregational churches in Maine, was introduced and addressed the Conference He gave the following statistics—14 conferences compose their General Conference Churches 239, ministers 168, additions by profession 461, by letter 246, whole number of members 16,765, persons in connection with sabbath schools 18,912, raised for benevolent causes $30,107, $9000 of this for home missions. Their next General Conference meets in Augusta in June The christian salutations of that church were heartily reciprocated by the Conference

Rev Mr Woodhull, Agent of the American Bible Society, was introduced, and made a very acceptable address in behalf of that worthy society, and in favor of the Book of God

Rev W F Farrington of the Maine Conference, Rev Mr Furber of the New England Conference and Rev D Wise, editor of the S S publications of the M E Church were introduced Quite a spirited discussion sprung up at this point about a *fossil* marked "*Cook's Centuries*"

Rev R B Curtis gave a brief description of the Bangor District. The churches are in a very favorable state, also the sabbath schools, and general interests Consideration of the character of effective elders was attended to

Rev Geo. Pratt gave a most favorable account of Rockland District There had been nearly two thousand conversions in this district under the labors of ministers of the M. E Church

Rev F A Soule represented the Bucksport district as being in a flourishing condition

Resumed the consideration of ineffective elders

Rev Mr DeHass, Secretary of the Tract Society of the M E. Church, offered some brief remarks,—informed the pastors that half the amount of money raised for the Society can be returned in Tracts, or in copies of the paper called the "Good News," —said that Wesley and Coke organized the first Tract Society in the world,—read a letter from Wesley in 1782, and from Dr Coke in 1783, showing their interest at that early period in the Tract movement. The M E Church has the largest religious publishing house, probably in the world Our unity depends upon our doctrines

Adjourned with Doxology and Benediction by Rev E H Small, of Lincoln

In the afternoon, Rev Mr Trowin, a Wesleyan Minister from New Brunswick, preached an excellent and fervent sermon from Isa 53, 5, "But he was wounded for our transgressions," &c

The anniversary of the East Maine Conference Missionary Society will be held this afternoon, at 2½ o clock Several speakers will address the audience

Rev Daniel Wise, Secretary of the Sabbath School Union of the M E Church, will deliver an address this evening upon the subject of Sabbath Schools

REV. S L. CALDWELL We regret to learn that Rev S L Caldwell of this city has decided to accept the call tendered him by the First Baptist Church of Providence, R. I.—The First Baptist Church at Providence is, we believe, the oldest in America, and the location is in every respect a desirable one We understand that Mr C has received calls from several other churches since he received the one from Providence—among them one from the Bowdoin Square Church, Boston, and the First Baptist Church, New Haven, Conn. Mr. Caldwell's career in this city has been one of great usefulness, and he will be missed by a large circle of friends of all denominations

REV DR TAYLOR In reference to the return of this gentleman to Bangor, spoken of by the Union, and copied by us, Rev. Mr. Helmershausen sends the following note

Mr Editor In your appreciative and well meant reference to Dr Tefft and Rev Mr Wardwell, in your issue of the 19th instant, there is one mistake, which may make a wrong impression upon some minds Dr Tefft, if he comes, will be subject to appointment, like other ministers. Some might understand from the paragraph referred to, that Dr T and the society had made an agreement without regard to the authority of the conference, which is not the fact. Your notice of Mr Wardwell is very just. There is a probability of Dr Tefft's joining this conference, but there is no appointment for him to preach in the Pine St M E church next Sunday, as he may not arrive in this city this week

Yours truly,
E A. HELMERSHAUSEN.

BELFAST TO BE LIGHTED WITH GAS—Our new gas light company are taking active measures to get their stock taken up, and for the erection of gas works in this city. A proposition has already been made, by parties engaged in the construction of gas works, to construct them for the city and take a lease of them for a term of years, paying at the rate of eight per cent on the cost, which is estimated at $18,000.—*Belfast Age.*

CONGRESSIONAL.

WASHINGTON, 20th.

SENATE.—Senator Haynes of S C took his seat.

The time of the Senate was occupied until 3½ past 12 o'clock, in the presentation of petitions and other private memorials.

Private bills were passed for the relief of Geo. McAuly, J H Smith, Jeremiah Pendergast, Geo Phelps, Joshua Shaw, William D Healy, Joseph Hardy, Alton Long and Benj S Edwards—the latter confirming a land title in New Mexico. Also for relief of Anthony Chase of New York, a soldier of 1812. Also a bill allowing the officers and seamen of the Kane expedition pay as in the Haven expedition. Also a general bill introduced by Mr Foster in lieu of numerous individual bills for continuance of half pay to the widows and orphans, under the act approved Feb. 3, 1853.—Some discussion ensued on this last bill, on the amendment of Mr Pugh, limiting the pension to the term of widowhood. The bill finally passed with the amendment. The bill for relief of Messrs Shurlock and Shirley was then discussed and postponed.

Mr Clingman introduced a bill to regulate the rates of foreign postage.

Mr Pugh introduced a bill to regulate the rights and sales.

Mr Sidell offered a resolution enquiring of the Secretary of War whether positions of the army should be supplied with breach-loading arms.

Mr Green, from the Judiciary Committee, reported against granting extended powers to the District Courts of California.

Mr Clay, from the Committee on Rivers and Harbors, reported against a large number of public improvement petitions.

Mr Gwin's Pacific Railroad bill did not come up.

The special order was Mr Johnson's Homestead bill, and he spoke in favor of it for three hours previous to the adjournment.

HOUSE.—Mr Haskin, of New York, asked leave to offer a resolution authorising the Willets Point Investigating Committee to proceed to New York for the purpose of examining witnesses.

Mr Bennett of Ky. objected.

Mr Fenton asked but failed to obtain leave to submit a resolution direc ing the Committee on Ways and Means to inquire into the expediency of authorising a loan of $10,000,000 to pay the claimants of sums to which they are legally entitled, including officers and soldiers of the revolution, and the arrears of pensions due to invalid pensioners of the war of 1812, and also to enquire whether any modification of the tariff is necessary.

The House passed the civil appropriation bill, after striking out a million of dollars for the capital extension, and by 4 majority retaining nearly an equal amount for the completion of the Washington aqueduct.

Mr Harris of Ill., from the Committee on Elections, made a report, concluding with a resolution that Messrs Phelps and Kavanah be sworn in members from Minnesota, provided that such qualifications and admission be not construed as precluding any contest of their rights which shall hereafter be instituted by any person having a right to do so.

Mr Gilmer of N C made a minority report.

Mr Washburn of Me. presented his views on the question.

Mr Harris said he should like to dispose of the subject. The majority preferred he would consent to a postponement till the reports are printed.

Mr Stevenson of Ky. hoped the subject would be settled now, and moved the previous question.

Disagreed by 5 majority. This vote was subsequently re-considered.

Mr Stevenson called for the reading of the reports. The Democrats generally seemed desirous of taking the vote on the question today. This was resisted by the Opposition, who made dilatory motions, and required the yeas and nays to be frequently taken.

Mr Davis of Md. suggested that the subject be postponed till Saturday, and in the meantime the reports can be printed, and gents ascertain the precise merits of the question.

Objections were interposed, motions to adjourn were made, appeals taken from the decisions of the chair, &c., and decided by yeas and nays. The contest continued for two hours. Adjourned.

From Washington.

WASHINGTON, 20th.

Messrs. Morrow, Branscomb and Winchell, commissioners at the settlers' mass convention in Kansas, to procure a loan fund for the squatters, have had in company with Mr Padfield, delegate from Kansas, an interview with the President, who intimated his willingness to postpone the sales till October, if they thought best, but desired them to call on the Secretary of the Interior. The latter stated that the policy of the government would be to sell all the public lands possible during the present year, for the purpose of a revenue, but consented to defer the sales in Kansas until Nov. 1st and 15th, when they will take place. The commissioners leave for New York on Friday, for the purpose of securing the loans needed.

The Sec'y of the Treasury was examined by the Willett's Point investigating committee today.

American Safety Paper

Manufacturing Company of N. Y.

Capital $500,000.

A. NICHOLAS, President. Office, 70 Wall-st.

A Perfect Security against all manner of Frauds or Counterfeiting on Paper.—To Prevent Photography and Ancotype Counterfeits, Erasures, Transfers or Alterations.

HAVING purchased the Patent for the exclusive right to manufacture and sell the Chemical Paper in America, invented and patented in England by HENRY GLYNN, a celebrated chemist and officer of the British army, it is hardly necessary to say that the Paper is recommended by Mr. Kent, Assayer of the U. S. Mint, Mr. Lyman of the New York Clearing House, and Meade Brothers, extensive and skillful photographers, 233 Broadway, N. Y. The latter say that no imitation can be made on a check or bank note printed on the Safety Paper. Below is our list of prices:

Bank Checks—36 cts. per lb.	
Bank Bills—$18 for 1000 sheets.	
Bills of Exchange—$25 for 1000 sheets.	
Promissory Notes—40 cts. per lb.	
Sight and Time Drafts—$25 for 1000 sheets.	
Insurance Policies—40 cts. per lb.	
Railroad Stocks and Bonds—40 cts. per lb	
Bank and State Stocks—40 cts. per lb.	
Bonds and Mortgages—40 cts. per lb.	
Wills and Deeds—40 cts. per lb.	

For wrapping Silks and other fine articles it is excellent, as it prevents moths.—40 cts. a lb.

For Indentures and Agreements, 40 cts. a lb.

All State and County Records should always be printed or written on this paper, as the chemicals inserted in the pulp not only prevents erasure or transfer, but make it lasting as time.

For Southern climates its excellence and much superior to any other, as the moistness of the climate does not destroy it,—the properties inserted in the pulp being preventive. In all the Southern States, Cuba, the West Indies, and the Central American States, no public records can be kept over 20 years, written on the ordinary paper, while the oils and other chemicals inserted in this paper makes it indestructible by the ravages of time. It is also proof against moths, rats and other vermin, which destroy and destroy all other paper now in use.

The Company have now in operation Mills in Morris County, N. J., of about 300 horse power, and are able to fill all orders for Paper at the shortest notice.

All orders for the Paper must be addressed to A. NICHOLAS, President of the Company, No. 70 Wall street, New York.

The new volume will be printed upon fine paper, with new type.

The general character of the SCIENTIFIC AMERICAN is well known, and, as heretofore, it will be chiefly devoted to the promulgation of information relating to the various *Mechanical and Chemical Arts, Manufactures, Agriculture, Patents, Inventions, Engineering, Mill Work*, and all interests which the light of Practical Science is calculated to advance. It is issued weekly, in form for binding; it contains annually from 500 to 600 finely executed engravings, and notices of American and European improvements, together with an Official List of American Patent Claims published weekly in advance of all other papers.

It is the aim of the Editors of the SCIENTIFIC AMERICAN to present all subjects discussed in its columns in a practical and popular form. They will also endeavor to maintain a candid fearlessness in combatting and exposing false theories and practices in Scientific and Mechanical matters, and thus preserve the character of the Scientific American as a reliable Encyclopedia of Useful and Entertaining Knowledge.

Specimen copies will be sent gratis to any part of the country. MUNN & CO.,

LINCOLN'S WATER PROOF BLACKING, AND LEATHER PRESERVATIVE.

Keep your Feet dry and you will seldom need a Physician.

IS it not a truth that when the feet are often wet, it is one of the greatest causes of colds and consumption? It is a truth that when leather is often wet and dried, it soon becomes hard, stiff, and cracks; but when it is water-proof this is remedied. By the application of this preservative, it remains soft, and entirely impervious to water.

After being engaged for 26 years in the manufacture of Leather in all its branches, and being often troubled with wet feet myself, I was led to experimenting on different compositions, and found it easy to make it water-proof, but at the same time extremely injurious to the leather. At last by a chemical process, I discovered a preparation which perfectly harmonizes with the astringent properties with which leather is tanned. It will not only make leather water-proof, but it likewise softens the leather, and it will

Positively wear twice as long.

I have now used it for three years, and a large part of that time have worked in a wet Tannery, with my boots constantly in water, and have not had my feet wet during that time. I can therefore in all confidence, recommend it to the public as the best article in the market.

American & Foreign Patents.

R. H. EDDY,

Solicitor of Patents,

(Late Agent of U. S. Patent Office, Washington under Act. of 1837,)

76 State Street, opposite Kilby-st.,

BOSTON.

AFTER an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France, and other foreign countries. Caveats, Specifications, Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with despatch. Research made into American or Foreign works, to determine the validity or utility of Patents or Inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.

This Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions, unsurpassed by, if not, secured elsewhere. The testimonials below given prove that REDDY MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber, and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional services so moderate. The immense practice of the subscriber, during twenty years past has enabled him to accumulate a vast collection of specifications and official decisions relative to patents. These, besides his extensive library of legal and mechanical works, and full accounts of Patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining patents.

All necessity of a journey to Washington to procure a patent, and the usual great delay there, are here saved inventors.

TESTIMONIALS.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor for procuring patents.—There were few, if any, persons acting in that capacity who had so much business before the Patent Office, and there were none who conducted it with more skill, diligence and success. I regard Mr. Eddy as one of the best informed and most skillful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office.

EDMUND BURKE,

Late Commissioner of Patents.

[From the present Commissioner.]

"AUGUST 17, 1853.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, has been extensively engaged in the transaction of business with the Office, as a solicitor. He is thoroughly acquainted with the law, and the rules of practice of the office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse. CHARLES MASON,

ADDRESS

To the People of the United States.

The Human System is infested with three distinct kinds of

WORMS,

Namely—The Tape Worm, the Round or Stomach Worm, and the Seat, or Pin Worm,

each having their peculiar action upon the system, in accordance with the abundance that may be lodged either in the stomach, intestines, or rectum, or the places they may inhabit.

"WHAT SHALL I TAKE?"

Why, purchase a (25 cent) Bottle of

HOBENSACK'S WORM SYRUP,

For, by using it according to the directions, you can cure yourself and children of

WORMS!

It is certain to cure you, as that you are conscious of your own existence; and if you are suffering after reading this pamphlet you must attach your loading a miserable existence to your own carelessness; for if any of the symptoms laid down in the pamphlet are visible, or felt, you need no longer doubt, but become satisfied that Worms are the cause of all your suffering. To you, then, I confidently recommend the use of my

WORM SYRUP.

From the knowledge of the powerful vegetable ingredients of which it is composed, together with the numerous unsolicited Testimonials I am daily receiving from families and others, who have been restored to health by a timely use of the

Vegetable Worm Syrup.

"Mother, I cannot take it!"

How often is this said by the many children who are drugged with Castor Oil, Turpentine, and such like nauseous doses, by their parents, for WORMS, simply because they are left by the ignorant to believe, they are CURE-ALLS.

But that difficulty is now obviated by the use of my

WORM SYRUP

which is compounded in such a manner that I have never known a single case in which they have

REFUSED TO TAKE IT!

as it is made in the form of a Syrup, and palatable to the taste of the most fastidious, and children, rather than refuse to take it, have actually been known to cry for it, so parents will find no difficulty in getting any child to take it—and yet, while it is so pleasant to the taste, it is the

Most Certain and Effectual Medicine

EVER DISCOVERED

and can be administered to the most *tender infant* with decided benefit.

Where BOWEL COMPLAINTS and DIARRHŒA have made them weak and debilitated,

ONE SINGLE DOSE

destroys the worms from the system, many times of the poor suffering children.

The following remedies are offered to the public as the best, most perfect, which medical skill can afford. "AYER'S CATHARTIC PILLS have been prepared with the utmost skill which the best medical knowledge of this age possesses, and they have virtues which surpass any combination of medicines hitherto known. Other purgatives do more or less good; but this comes nearer to cure complaints, so quick and so surely, that it is an efficacy and a power to expect about which any thing which men have known before. By removing the obstructions of the internal organs, stimulating them into healthy action, purifying the fountains of life and vigor,—health courses again through the body, and the sick are no longer sick only, for when taken by one in health it works but little effect. This is the perfect medicine. It is antagonistic to disease, and so rare. Indeed, children may take them with impunity. If they are sick they will cure them, if they are well it will do them no harm.

Give them to some patient who has been long tortured with bilious complaint; see his sallow complexion form straighten with strength to match the long-lost appetite return; see his clouded brain blossom into health. Give them to some poor dyspeptic whose foul blood has burst out in scrofula on the skin is covered with sores, who stands, or rather lies in anguish. He has been drenched, doctored, dosed out with every potion which ignorance or quackery can give. Give him these PILLS
